

UNI-BLADE

One Blade Fits All 4 Sizes

- ▶ *Eliminates the need for multiple laryngoscope blades*
- ▶ *Saves space, time and money*

Features and Benefits:

- **Patented One-Blade-Fits-All Design:** Uni-Blades unique multi-positional attachment system allows for functional adjustment of the blade length.
- **Eliminate the Need for Multiple Laryngoscope Blades:** This system ensures a precise, one-blade-fits-all solution.
- **One Adjustable Blade with 4 Size Positions:** Uni-Blades adjustable length ensures the right fit for each patient, streamlining the process in anesthesia, emergency and clinical settings.
- **Space Saving Design:** By combining 4 blade sizes into one, the Uni-Blade reduces clutter on crash carts, field kits, ambulances, helicopters, and other transport vehicles. Ideal for military medical units where space and weight are critical. Ideal solution for any inventory management system. Uni-Blade reduces the number of inventory items stocked reducing cost, time and maximizing inventory efficiencies.
- **High-Strength Curved Material with LED Light Tube:** Combines durability and superior visibility to improve patient outcomes during intubation.
- **Disposable Design:** Ensures hygiene and reduces the risk of cross-contamination in high-risk environments.
