

PEPPER MEDICAL

#707 Endo-Tie (Adhesive) LATEX FREE

Instructions

1. Slide the Trach Tape under the patient's neck with the blue foam facing up.
2. With the patient's neck centered over the blue foam, remove only the adhesive body strips adjacent to the blue foam and secure to the patient's cheek area.
3. Remove the adhesive tail strips and secure one at a time from alternating sides.
4. Secure one tail from each side around the trach tube and one tail from each side above and below the patient's mouth
